Open First

The topic of Research Analysis is lengthy and is usually taught as a 6 hour course. Due to the time constraint of this class we will not be able to cover everything and so the enclosed handouts will fill in the gap.

This file folder has many handouts. You do not need to read them all before class. They are very good and I would encourage you to read them at some point.

For the class you need only to read the **Research Analysis** handout. You will only need to print out the **Chart Example** and bring it to class. Everything else you can read and print later.
